About myself

DevOps Engineer with over 3 years of experience in cloud infrastructure, CI/CD, and automation. Skilled in AWS, Azure, Terraform, Kubernetes, and GitLab CI, with a strong foundation in Linux and Infrastructure as Code.

Experience

Helping To Leave

DevOps Engineer

November 2023 - Present

Supported the development and maintenance of cloud infrastructure on AWS using Terraform (IaC).

- Created and improved CI/CD pipelines using GitLab CI to automate and accelerate software delivery.
- Assisted in deploying applications to staging and production environments in Amazon EKS using Terraform and GitOps (ArgoCD).
- Collaborated with cross-functional teams, including product developers and QA engineers, to support daily operations and drive continuous improvement initiatives.
- Followed SCRUM methodology to plan sprints, attend stand-ups, and deliver tasks in iterative cycles.
- Managed and monitored relational databases with AWS RDS.
- Automated routine tasks and workflows using Python and shell scripting.
- Utilized tools and technologies including AWS, Terraform, Kubernetes (EKS), GitLab CI, Docker, Python, ArgoCD, and CI/CD.

Easycommerce

DevOps Engineer

May 2022 - October 2023

- Built and managed infrastructure for a PIM system using AWS, Kubernetes, PostgreSQL, Redis, Kafka, and GitLab CI/CD.
- Supported developers by creating Dockerfiles and Docker Compose configs across microservices.
- Established documentation standards and authored initial Confluence materials.
- Handled release management, maintenance, monitoring, and incident response (DRP, backups, recovery automation).
- Actively supported product teams, assisting with Docker and CI/CD across services.

EPAM systems

Internship

December 2021 - May 2022

Gained hands-on experience in modern DevOps practices and cloud infrastructure.

- Built and managed Infrastructure as Code (IaC) solutions using Terraform and Ansible
- Implemented and maintained CI/CD pipelines to streamline software delivery processes
- Containerized applications using Docker and orchestrated deployments with Kubernetes
- Gained practical experience with cloud platforms including Microsoft Azure, GCP and AWS
- Applied knowledge of Software Development Lifecycle (SDLC) and Agile methodologies

The Parts

System Administrator

July 2017 - October 2021

- Maintained and supported the company’s main e-commerce site (PHP, Nginx, MySQL, CentOS 7).
- Administered Active Directory services on Windows Server 2012 and 2016.
- Managed and maintained office IT equipment and infrastructure.
- Performed routine system tasks, including backups, documentation, and reporting.

Skills

Linux, Python, Docker, Kubernetes, Terraform, AWS, Prometheus, Proxmox, Nginx, GitHub Actions, GitLab CI\CD, ArgoCD, Azure

Education

Saint-Petersburg University of Film and Television

Information systems and technologies

2011 - 2015
